# SecurityPlus
### for MDaemon

## Proactive, Layered Protection Against Spam, Viruses, and Malicious Email

SecurityPlus for MDaemon Messaging Server extends the built-in security features of MDaemon, providing an additional layer of defense to stop security trouble before it starts. By combining multiple security safeguards, it blocks virtually all known dangers, plus prevents infection of newly released threats. It proactively protects email users against viruses, spam, phishing attacks, spyware, and other types of unwanted and harmful email. It relieves pressure on network resources—including bandwidth, computer resources, and time—by refusing entry to malicious email.

## Key Features

- **Zero-Hour Virus Outbreak Protection** — Real-time pattern analysis provides much faster protection than traditional filter and signature based solutions that require detecting, defining, and disseminating new virus information.

- **Inline Antivirus Scanning** — SecurityPlus scans messages inline during each SMTP session, effectively stopping malicious software at the email entrance to your network.

- **Urgent Update Notification** — When a high-risk virus threat is identified, you can select to be notified and trigger SecurityPlus to automatically initiate a database update of the latest virus definitions.

- **Versatile Control** — When an infected attachment is detected and you have selected to not block the message outright, you have the option to clean it, quarantine it, delete it, or allow MDaemon's Content Filter to handle it.

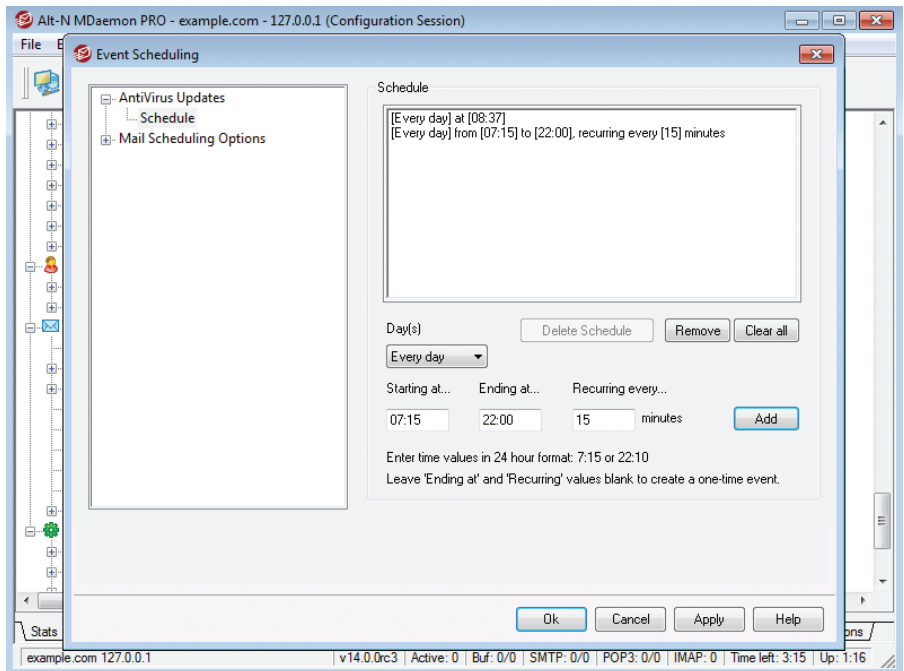

Configuration screen for Outbreak Protection.

## Key Benefits

- **Proactive Protection.** Real-time, heuristic technology analysis of internet email patterns can detect threats, often within minutes of an outbreak.

- **Full Integration.** Designed to operate seamlessly with the MDaemon Email Server, providing unparalleled protection of your messaging system.

- **Accurate Detection.** High rate of accuracy in message analysis virtually eliminates the misidentification of legitimate email.

- **Simple Administration.** Automatic update scheduling, administrative log files, and intelligent defaults make protecting your system easy.

- **Multiple Layers of Protection.** SecurityPlus incorporates signature matching, heuristic analysis, and "zero hour™" antivirus protection to deliver the strongest solution available for the MDaemon Messaging Server.

- **Investment Protection.** Includes one year of renewable Upgrade Protection, providing free upgrades to the latest product versions for the duration of the Upgrade Protection term.

## System Requirements

- MDaemon 9.5 or higher
- The number of SecurityPlus user licenses must equal (or be greater than) the number of user accounts in your MDaemon server, otherwise, you will not be able to add new MDaemon accounts, or SecurityPlus will be deactivated until you increase your SecurityPlus license size
- Microsoft Windows XP Service Pack 2/2003 Service Pack 1/Vista/2008/7/2012/8 (including 64-bit versions)
- CPU 800 MHz processor or higher (dual core CPU 2.4 GHz or higher recommended)
- 512 MB of RAM (1 GB recommended)
- TCP/IP network protocol installed
- Internet or Intranet communication capabilities

SecurityPlus detects infected attachments in both plain text and HTML messages. When an infected attachment is detected and you have selected to not block the message outright, you have the option to clean it, quarantine it, delete it, or allow MDaemon's Content Filter to handle it.
